SUMMARY

With a strong foundation in problem-solving, analytical thinking, and user-focused mindset, I am passionate about software development, particularly in Java.

I have experience working in dynamic environments that require adaptability, communication, and logical decision-making. These experiences have strengthened my ability to understand system requirements and build effective solutions.

I am seeking an opportunity as a Java Developer where I can apply my technical skills, continuously improve my knowledge, and contribute to building scalable and high-quality software systems.

EDUCATION

Thuy Loi University

2023 – 2027

Major: Information technology

PROJECTS

Pizza Ordering System (Backend API) | [Bao112003/DELI_API](#)

Developed a RESTful backend system for an online pizza ordering application using Spring Boot, supporting user management, product catalog, and order processing.

Technologies: Java, Spring Boot, Spring MVC, Spring Data JPA, MySQL, Maven, RESTful API

Key Contributions:

- Designed and developed REST APIs for user authentication & authorization, product catalog, and order processing
- Implemented CRUD operations for users, products, categories, and orders
- Built layered architecture (Controller – Service – Repository) with JPA/Hibernate integration
- Integrated payment processing and image upload handling
- Handled request validation, response standardization, and API testing with Postman

SKILLS

Backend: Java (Core Java, OOP), Spring Boot, Spring MVC, Spring Data JPA

Frontend: React.js

Database: MySQL

Tools: Git, GitHub, Postman, Maven
